Are you getting a bachelor’s degree in Chemistry or a related science? Did you know that adding a master’s degree in Chemical Engineering can greatly enhance your career opportunities?

Scientist to Engineer
Master of Science in Chemical Engineering

Our Scientist to Engineer Program is an intensive, accelerated program designed especially for new M.S. students without a B.S. in Chemical Engineering. This program covers the essentials of the entire undergraduate curriculum, followed by a standard M.S. program. Typically this can all be accomplished in three semesters.

For more information, visit: www.cheme.columbia.edu
“The Master of Science program offers a deep understanding of the physical, chemical, and biological nature of things, and provides insight into an exploding variety of new technologies that are rapidly reshaping our society.”

—Sanat Kumar, Professor
Department of Chemical Engineering

M.S. APPLICATION DEADLINES

Fall Term .......................February 15

Spring Term ....................October 1
